Pages

ABERTH, OLIVER, The elementary symmetric functions in a finite field of prime order. 132–138

APPLING, WILLIAM D. L., Interval functions and absolute continuity. 439–445

ARKOWITZ, MARTIN, Commutators and cup products. 571–581

AYOUB, RAYMOND, On L-series with real characters. 550–555

BAER, RHEINHOLD, The hypercenter of functorially defined subgroups 177–230

BILLINGSLEY, PATRICK, An application of Prohorov's theorem to probabilistic number theory. 697–704

BLOCK, RICHARD E. and ZASSENHAUS, HANS, The Lie algebras with a nondegenerate trace form. 543–549

BOYLAN, EDWARD S., Local times for a class of Markoff processes. . 19– 39

CATER, S., Some representation theorems for invariant probability measures 408–418

CLAY, JESSE PAUL, Invariant attractors in transformation groups. . 473–479

CORSON, H. H. and MICHAEL, E., Metrizability of certain countable unions 351–360

CUNNEA, WILLIAM M., Unique factorization in algebraic function fields 425–438

DAWSON, DONALD A., The construction of a class of diffusions. . . 657–684

DAY, MAHLON MARSH, Convolutions, means, and spectra. . . . 100–111

———, Correction to my paper "Fixed-point theorems for compact convex sets" 713

DE LEEUW K., and MIRKIL, H., A priori estimates for differential operators in L_∞ norm 112–124

DEMARR, RALPH, Partially ordered linear spaces and locally convex linear topological spaces. 601–606

DOYLE, P. H., On the embedding of complexes in 3-space. 615–620

DUDLEY, R. M., A property of a class of distributions associated with the Minkowski metric. 169–174

Pages

DULMAGE, A. L. and MENDELSOHN, N. S., Gaps in the exponent set of primitive matrices. 642–656

ELLIS, ROBERT, Global sections of transformation groups. 380–394

GORDON, WILLIAM R., with MARCUS, MARVIN, Inequalities for subpermanents 607–614

GRIFFITHS, PHILLIP A.. Deformations of holomorphic mappings. . 139–151

HAYDEN, T. L. and MERKES, E. P., Chain sequences and univalence. 523–528

HELD, DIETER, Engel conditions and direct decompositions into groups of coprime order. 582–585

———, Closure properties and partial Engel conditions in groups. . 705–712

ISAACS, I. M. and PASSMAN, D. S., Groups whose irreducible representations have degrees dividing p^e. 446–457

ITO, TAKASHI, On the continuity of lattice automorphisms on continuous function lattices. 419–424

JENKINS, JAMES A. Some area theorems and a special coefficient theorem 80– 99

KNOPP, MARVIN ISADORE and SMART, JOHN RODERICK, On Kloosterman sums connected with modular forms of half-integral dimension. 480–487

KOCHEN, SIMON and STONE, CHARLES, A note on the Borel-Cantelli lemma 248–251

KURTZ, HAROLD C., The linear cubic p-adic recurrence and its value function 125–131

LEARNER, A., Residual properties of polycyclic groups. 536–542

LEHMER, D. H., On a problem of Størmer. 57– 79

LEHNER, JOSEPH, On automorphic forms of negative dimension. . . 395–407

LEVINE, HAROLD I., The singularities of S^q_1. 152–168

LINDENSTRAUSS, JORAM, On the extension of operators with a finite-dimensional range 488–499

LÜNEBURG, HEINZ, Finite Möbius-planes admitting a Zassenhaus group as group of automorphisms. 586–592

MACDONALD, I. D., Generalisations of a classical theorem about nilpotent groups. 556–570

Pages

MACKEY, GEORGE W., Ergodic transformation groups with a pure point spectrum 593–600

MAC NERNEY, J. S., A nonlinear integral operation. 621–638

MAHLER, KURT, A remark on a paper of mine on polynomials. . . 1– 4

MAHOWALD, MARK, On the measurability of stochastic processes. . 312–315

MANN, H. B., Balanced incomplete block designs and Abelian difference sets 252–261

MARCUS, MARVIN and GORDON, WILLIAM R., Inequalities for subpermanents 607–614

MAZUR, BARRY, Corrections to my paper, "Symmetric homology spheres" 175

MENDELSOHN, N. S., with DULMAGE, A. L., Gaps in the exponent set of primitive matrices 642–656

MERKES, E. P., with HAYDEN, T. L., Chain sequences and univalence. 523–528

MICHAEL, E., with CORSON, H. H., Metrizability of certain countable unions 351–360

MIRKIL, H., with DE LEEUW, K., A priori estimates for differential operators in L_∞ norm 112–124
